

Instructions for Preparing for Your Project 2 Demo

1. If you work with another student as a team, both of you should be present at the Zoom meeting of the instructor or the TA you signed up for your demo if at all possible.
2. You will do your demo on your laptop. Make sure it's ready to go when you come to do the demo.
3. During the demo, you will be asked to perform several specific tasks. If your program has problem(s), you will be given ONE chance to fix the problem(s) and reschedule the demo within 24 hours. 10% of the credit for this project will be taken off if this happens. Each team has only ONE chance to schedule another demo. You are not allowed to fix your code while doing the demo.

If you come unprepared (e.g., tables are not initialized correctly, you are late for your demo, your laptop keeps crashing, etc.), you will lose the credit for Project 2 automatically and also lose the chance to schedule another demo.
